

Skunk Recipe & Directions

Required Items:

- 2 teaspoons of liquid dish soap (Dawn, Joy, etc.)
- 1 quart of 3% hydrogen peroxide (NOT expired!)
- ¼ cup baking soda
- Plastic bucket and gloves
- Washcloth

In the plastic bucket, combine all the ingredients and set aside.

FIRST, wash your pet thoroughly with liquid dish soap **ONLY** and rinse well. Avoid the eyes. **SECOND**, apply **all** of the mixture and work deep into hair. Use a washcloth to apply the mixture around the face. Again, avoid the eyes. Leave the mixture on your pet for 10 minutes. Rinse your pet well with water. Use a towel to dry your pet, but do not use heat dryers!

NOTES:

Often collars and leashes need to be replaced. The fabric or leather will harbor the smell.

Try leaving out pans/bowls of white vinegar to absorb the smell in your home. (Make sure pets cannot access vinegar!)

Open windows to allow air to circulate.
